

Botshilu Annual Healthcare Professionals' CPD Symposium

Date: **Sunday, 19 November 2023**
Time: **07:15 - 17:30**
Venue: **The Blades Hotel,
Plot 75 Zeekoegat,
Kameeldrift East, Pretoria**

Surmounting Knowledge Barriers
for Improved Clinical Outcomes

for *Healthcare Professionals*

in partnership with Ampath Laboratories and MD Health Connexions

Welcome Note

To our Esteemed Healthcare Professionals,

Welcome to our Annual Healthcare Professionals CPD Symposium.
We are elated to be hosting you today.

Theme: Surmounting Knowledge Barriers for Improved Clinical Outcomes

Introduction:

In the dynamic landscape of healthcare, ensuring improved clinical outcomes is of paramount importance. Our Healthcare Professional CPD Symposium theme this year **"Surmounting Knowledge Barriers for Improved Clinical Outcomes"** aims to equip healthcare providers with the tools and strategies to overcome knowledge barriers that can hinder optimal patient care. This informative content will delve into the key aspects of knowledge barriers, their impact on clinical outcomes, and practical approaches to overcome them.

Understanding Knowledge Barriers:

Knowledge barriers refer to obstacles that impede the acquisition, dissemination, and application of accurate and up-to-date medical information. These barriers can include misinformation, limited access to resources, lack of time for continuous learning, language barriers, and resistance to change.

Impact on Clinical Outcomes:

Knowledge barriers can have a profound impact on clinical outcomes, leading to misdiagnoses, ineffective treatments, increased medical errors, and suboptimal patient care.

By addressing these barriers, healthcare professionals can significantly improve patient safety, enhance treatment efficacy, and promote evidence-based practices.

Key Strategies for Surmounting Knowledge Barriers:

1. Continuous Education:

- Healthcare professionals are encouraged to engage in lifelong learning through similar workshops, seminars, online courses, and medical conferences.
- Foster a culture of curiosity and self-directed learning to stay updated with the latest medical advancements

2. Access to Reliable Resources:

- Gain access to reputable medical databases, journals, and online platforms for evidence-based research.
- Support the development of local libraries and resource centres for easy access to relevant information.

3. Collaboration and Interdisciplinary Communication:

- Promote interdisciplinary collaboration to share knowledge and insights across different healthcare specialities.
- Establish regular case review meetings, such as Morbidity and Mortality (M&M) meetings, to facilitate knowledge exchange and collective problem-solving.

4. Technology Integration:

- Embrace digital tools such as medical Apps, databases, and telemedicine platforms to facilitate efficient knowledge dissemination.

Conclusion:

Overcoming knowledge barriers is pivotal for healthcare professionals' striving to achieve improved clinical outcomes. By embracing continuous education, facilitating access to reliable resources, promoting collaboration, integrating technology, adhering to evidence-based guidelines, empowering patients, and fostering a learning culture, healthcare providers can elevate the quality of care they deliver. The annual Botshilu Healthcare Professionals CPD Symposium on "Surmounting Knowledge Barriers for Improved Clinical Outcomes" seeks to equip participants with these strategies, ultimately benefiting both healthcare professionals and the patients they serve.

Yours in Health,

The Organiser:

Mrs Boitumelo Mphake

Stakeholder Relationship Manager: Botshilu Private Hospital
072 202 2601 | tumi.mphake@phelangbonolo.co.za

Our Program

07:15 - 07:45: ARRIVAL AND REGISTRATIONS

07:45 - 07:50: Welcome Address

Mr Gerrit van den Berg
Hospital General Manager

07:50 - 08:00: Opening and Introduction

Dr Becky Kgole
Pulmonologist

08:00 - 08:30: Gallstone Disease and its Complications

Dr Mashudu Mufamadi
General Surgeon

08:30 - 09:00: Knee Inflammatory Disorders

Dr Nkosiphendule Mzayiya
Orthopaedic Surgeon

09:00 - 09:30: Blood Handling Disasters: What could go wrong?

Dr Boitumelo Phiri-Ramongane
Chemical Pathologist

09:30 - 10:00: Cashflow for your Practice Management

Ms Lindi-Ann Hannekom
CompSol and MedSol Consultant

10:00 - 10:30:

TEA/COFFEE BREAK & NETWORKING WITH EXHIBITORS

10:30 - 11:00: Menopause and its Health-related Problems

Dr Mwewa Kalenga
Obstetrician and Gynaecologist

11:00 - 11:30: Abdominal Imaging

Dr Maletsema Kekana
Radiologist

11:30 - 12:00: Blunt Chest Trauma (Flail Chest)

Dr Joseph Sekgololo
Cardiothoracic Surgeon

12:00 - 12:30: Psoriasis

Dr Rose Mfikwe
Dermatologist

12:30 - 13:00: Depression Among Healthcare Professionals

Dr Prudence Molete
Psychiatrist

13:00 - 14:00: Lunch

14:00 - 14:30: Review Your Practice Business Model for Growth in 2024

Dr Sakkie du Plessis
CEO: Practice Growth Consulting

14:30 - 15:00: Acute Knee Dislocations

Dr Tlou Boshomane
Orthopaedic Surgeon

15:00 - 15:30: Early Detection of Prostate Cancer

Dr Wisani Mamitele
Urologist

15:30 - 16:00: How to Set Your Practice Up for Billing Success

Mr Eric Mtileni
Senior Sales Consultant: Healthbridge

16:00 - 16:15: Mid-Afternoon Refreshments

16:15 - 16:45: Diseases of Lifestyle and the Eye

Dr Khutsiso Debeila
Ophthalmologist

16:45 - 17:15: Adults Vaccinations

Dr Becky Kgole
Pulmonologist

17:15 - 17:30: Closing Remarks

Mr Maxwell Ndlovu
Managing Director: MD Health Connexions

**17:30 - 19:00: MINGLE & UNWIND. NETWORKING WITH EXHIBITORS.
SUNDOWNER (LIGHT SNACKS & DRINKS)**

Dr Mashudu Mufamadi
General Surgeon
MBChB (Wits) FCS (SA) MMed Surgery (SMU)

Dr Mufamadi practices at Suite No.12 and can be contacted at 012 798 7023 | 061 191 0193

Dr Mashudu Mufamadi is a specialist general surgeon registered with the HPCSA, CMSA and ASSA. Upon finishing his matric in 2000, he then enrolled for medical training at Wits where he completed his undergraduate degree in 2006. He served the people of Limpopo in Mankweng and Mokopane regions during his internship, community service, and as a medical officer from 2007 until 2013.

Dr Mufamadi went through a rigorous specialist training at both UP and SMU between 2013 and 2017. He is currently the managing director at DR M MUFAMADI INC. He believes in rendering patient-centered surgical care and enjoys doing this currently at Botshilu Private Hospital.

Dr Mufamadi blends his compassionate approach in pursuit of the best possible outcomes for his clients by being consistently consistent and uncompromising, and he sees himself as a medical Actuary.

Notes

Thanks to our sponsors:

Dr Nkosiphedule Mzayiya
Orthopaedic Surgeon

MBChB (TRANSKEI) FC Ortho (SA)

Dr Mzayiya practices at Suite No.16 and can be contacted at 012 798 7089| 072 362 3858

Well-versed in arthroplasty, Dr Mzayiya is a humble doctor, dedicated to his work. Dr Nkosiphendule Lindani Mzayiya completed his medical degree at Walter Sisulu University in 2004, he went on to complete his internship year at the Bloemfontein Hospital complex and community service year at Cofimvaba Hospital. He remained at this same hospital for the next year as Principal Medical Officer of the ARV Clinic. In 2009, Dr Mzayiya was appointed Medical Officer in Orthopaedics at Frontier Hospital in Queenstown before moving to Bedford Orthopaedic Hospital. He has been in the field of Orthopaedics for more than 10 years.

He further enrolled at the College of Medicine South Africa (CMSA) and Sefako Makgatho University (SMU) from 2010 to 2014 which he started with joint replacement in his final year of specialisation. Dr Mzayiya has been working in the Arthroplasty Unit - at Sefako Makgatho University since and completed a fellowship in 2015 with Smith and Nephew. As a senior consultant for the past five years, and having worked in private practice since 2014, he has gained immense knowledge and experience in joint replacement surgery, particularly knee and hip arthroplasty and unicompartmental replacement, as well as robotics procedures, including revision of both the knee and hip replacement with special emphasis in early and enhanced recovery programmes.

With the advent of 4th industrial revolution, the future of knee and hip replacement will be done using robotics which he is equipped to do knee replacement with robotics.

Notes

Thanks to our sponsors:

Dr Boitumelo Phiri-Ramongane Chemical Pathologist

BSc (Chemistry),
MMed FCP (Chemical Pathology)

Dr Phiri-Ramongane practices at Ampath Laboratories and can be contacted at 012 484 6550| 083 251 8604

Dr Boitumelo Phiri-Ramongane was previously a Chemical Pathologist at Dr George Mukhari Hospital and she is currently a Clinical Chemist (Chemical Pathologist) at Ampath since 2019 to date, and a Technical Advisor at CMS. She successfully completed her undergraduate degree at the University of Limpopo (MEDUNSA), in 2006. In 2015, she completed her postgraduate degree in Chemical Pathology at the Sefako Makgatho Health Science University (SMU) and College of Medicine South Africa (CMSA).

Dr Phiri's fields of expertise include conducting diagnostic and clinical services in the laboratory. She has a special interest in increasing quality healthcare including point care of care testing, research, transgender/reproductive health, and non-communicable diseases, especially diabetes and lipid disorders.

She has published eight articles and reviews, and she is also an editorial member of EC Gynaecology Journal. She is also a frequent speaker at National and International conferences on laboratory-related matters.

FAST FACTS: SIPONIMOD AND CYP2C9 GENOTYPING

Pre-emptive pharmacogenomic testing has been proven to reduce adverse drug reactions.

Siponimod (Kiendra™) is now registered in South Africa for the treatment of secondary progressive multiple sclerosis (SPMS). Siponimod is contraindicated in patients with the CYP2C9 *3/*3 genotype (poor metabolisers). Dosage adjustment is required for the CYP2C9 *1/*3 and *2/*3 (intermediate metaboliser) genotypes. SPMS patients therefore require CYP2C9 genotyping prior to initiating siponimod therapy.

CYP2C9/Siponimod genotype-based dosing guidelines*

*Source: Siponimod package insert

- CYP2C9 genotyping is now available at Ampath.
- CYP2C9 genotyping is performed as part of our comprehensive pharmacogenomics panel (Test Mnemonic: **PHARMA**).
- Results are available within 10 working days.

For more information please contact: pgx@ampath.co.za

PATHOLOGY SOLUTIONS
ARE IN OUR DNA

ampath.co.za

FAST FACTS: EVIDENCE FOR GENOTYPE-GUIDED ANTIPLATELET THERAPY IN PATIENTS WITH CORONARY ARTERY DISEASE

Pre-emptive pharmacogenomic testing has been proven to reduce adverse drug reactions.

Dual antiplatelet therapy with aspirin and a P2Y₁₂ receptor inhibitor (clopidogrel, prasugrel, or ticagrelor) remains the standard of care for the prevention of ischemic events in patients with coronary artery disease, in particular those with acute coronary syndrome (ACS) or in patients undergoing percutaneous coronary intervention (PCI). Clopidogrel is the most commonly prescribed P2Y₁₂ inhibitor because of its favourable safety profile, low cost, and broad indications for use.

Approximately 30% of patients treated with clopidogrel have high on-treatment platelet reactivity (HPR), an established marker of thrombotic risk in patients undergoing PCI. More potent P2Y₁₂ inhibitors like prasugrel and ticagrelor can overcome this limitation, but are more expensive and have a higher risk of bleeding complications.

One important reason for clopidogrel response variability is genetic polymorphisms of the CYP2C19 enzyme. Carriers of loss-of-function (LoF) alleles for CYP2C19 are characterised by reduced generation of clopidogrel's active metabolite, leading to increased rates of HPR and enhanced risk for thrombotic complications.

A meta-analysis published in JACC in 2021 reviewed results of seven randomised controlled trials involving 15 949 patients. The authors concluded that the selective use of prasugrel or ticagrelor among CYP2C19 LoF carriers, combined with the selective use of clopidogrel among non-carriers of LoF alleles, results in a clinically significant reduction in bleeding complications while avoiding the increased ischemic risk associated with unselected use of clopidogrel (see diagram on next page).

Dr Mmewa Kalenga
Obstetrician & Gynaecologist
MBChB (MEDUNSA) FCOG (SA)

Dr Kalenga practices at Suite No.03 and can be contacted at 012 798 7034| 072 428 8379

Dr Mwewa Martinho Kalenga matriculated in 1989. He studied three years at the University of Lubumbashi in Katanga DRC, and due to political issues, he came to South Africa in 1995. He restarted his studies at MEDUNSA in 1997 and completed his MBChB in 2002.

Dr Kalenga, did his internship in Upington at Gordon Hospital in 2003, followed by his community service Matibidi Hospital, a small rural hospital about 400km from Pretoria at Mpumalanga.

Upon completing his community service, he fell in love with the place and stayed for four more years as a senior Medical Officer in charge of maternity and paediatric wards, and this was when he developed his passion for women's health.

Towards the end of 2008, he went back to specialise in Obstetrics and Gynaecology and completed his studies as a fellow in Obstetrics and Gynaecology in 2014, the same year Botshilu Private Hospital opened its doors.

Dr Kalenga is passionate about women's health, with special attention to infertility and high-risk pregnancy.

Thanks to our sponsors:

From this list alone, it's clear that as a doctor & business owner, **Healthbridge's cloud-based digital solution** gives you **access to all the information you need** to offer patients the best treatment & run a modern, thriving practice.

www.healthbridge.co.za | sales@healthbridge.co.za | 0860 200 222

How to become a **modern, paperless medical practice** with Healthbridge

Digitising your business is a good idea, but what does it mean exactly & how can it help you run a thriving practice?

Appointment bookings

Healthbridge enables patients to book appointments at a time that is convenient for them via an online patient appointment booking platform that integrates directly with the practice's online calendar. Not only is it convenient for patients, but it will save you & your staff precious time.

Medicine selection

Healthbridge's digitised medicine selection process enables you to quickly view all medicine forms, prices, generics, alternatives & formularies on a single screen to easily prescribe the most optimal choice for your patients. **PLUS as you use our system, it gets smarter.** It will learn & suggest your preferred medicine choices per condition, making you even more efficient.

Appointment reminders & patient notifications

Business reports: Healthbridge collates your most important data to show you how you are doing from a clinical, operational & financial point of view. Get the real-time information you need to make decisions that will grow & improve your business.

Pathology reports

Receive pathology reports directly from labs & have them automatically uploaded to the correct patient's profile.

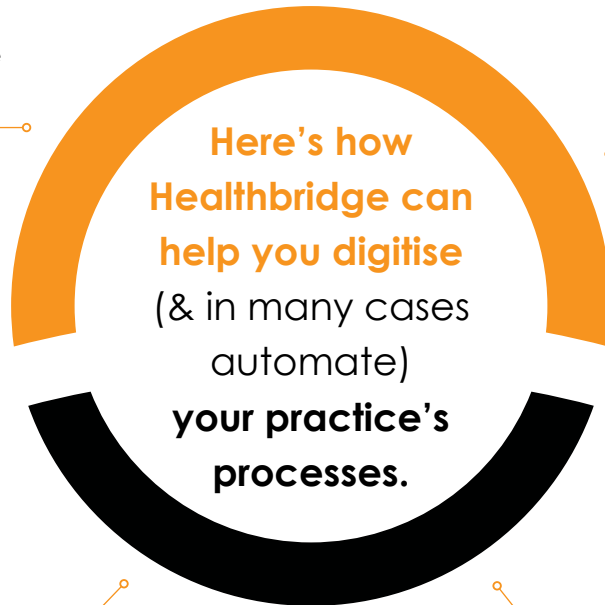

Patient files & clinical notes

Create (via stylus, text or templates) & store your patient files & notes as electronic medical records (EMRs) in the Healthbridge system. Our EMR will collect, organise & present data in a way that makes the information easy-to use & analyse so you can treat at the top of your licence.

Billing instructions

After completing your diagnosis, applicable procedures, consumables & medication are proposed for you to confirm. Chosen options are quickly converted into an invoice. No more having to write down what was done during the consult for staff to bill, as all of this is seamlessly integrated into the Healthbridge Billing system.

Here's how
Healthbridge can
help you digitise
(& in many cases
automate)
your practice's
processes.

Checking patient benefits & medical aid membership

Healthbridge automates patient validation & benefit checks, so you don't need to. Know how much your patient is covered for before their consultation.

Claiming

Send claims in real-time & get instant feedback as to whether a claim will be paid or not & how much.

Sick notes, prescriptions & referral letters

Create & send directly from the Healthbridge system. Plus, a record is created should you need to verify what was sent & when.

Reconciliations

Healthbridge's system will automatically reconcile your remittances, saving your practice hours of valuable time.

Dr Joseph Sekgololo
Cardiothoracic Surgeon
MBChB (UL-MEDUNSA) MMed (SMU) FC Cardio

Dr Sekgololo practices at Suite No.01 and can be contacted at 012 798 7030 | 079 673 0855

Dr Joseph Motshedi Sekgololo is a Cardiothoracic Surgeon, with a special interest in minimal invasive cardiothoracic surgery. He obtained his medical degree at the University of Limpopo (MEDUNSA), and his master's degree in cardiothoracic surgery at Sefako Makgatho Health Sciences University.

In 2017 he received a scholarship for the best researcher, which allowed him to go for the International Uniportal Video-Assisted Thoracoscopic Surgery (Uniportal VATS) training program, at Shanghai Pulmonary Hospital in China.

Dr Sekgololo has the best interest in scientific writing. He has published several articles as a lead or first author, which included case reports and original articles. He is currently a PhD fellow in cardiothoracic surgery.

Dr Prudence Molete
Psychiatrist
MBChB (MEDUNSA) MMed Psych (MEDUNSA)

**Dr Molete practices at Suite No.01 and
 can be contacted at
 012 798 7030 | 082 474 1883**

Dr Mary-Ann Gloria Prudence Patty Molete is a Specialist Psychiatrist who runs her own private practice at Dr Molete Wellness Clinic based in Mabopane, holds office at Vista Clinic in Centurion, and practices at Botshilu Private Hospital in Soshanguve.

She practiced as a General Practitioner for 10 years, & began specialising as a private Psychiatrist in 2008. She held office as a Principal part-time lecturer at Sefako Makatho University (SMU), an examiner for the Diploma in Mental health at the College of Medicine South Africa (CMSA), an external examiner for final year undergraduates at SMU & UKZN.

She also served on the Aeromedical Committee of the South African Civil Aviation Authority in 2018. Dr Molete is currently an Associate Lecturer for fifth-year students at the University of Pretoria (UP) and is an adjudicator for Aeromedical Committee. She is affiliated with the HPCSA and the South African Society of Psychiatrists Northern region and is a Board member in several organisations including the Mabopane Business Forum and the Stigmatine Catholic Organisation.

Dr Molete is extremely passionate about mental well-being, and as such, also hosts mental health awareness workshops under her subsidiary program “The You Perspective”, and is currently completing her PhD degree.

**Dr Wisani Mamitele
Urologist**

MBChB (LIMPOPO) FC Urol (SA) MMed Urol (UP)

Dr Mamitele practices at Suite No.01 and can be contacted at 012 798 7030 | 072 444 2772

Dr Wisani Craig Mamitele is an enthusiastic and selfless Urologist in public and private hospitals. Born and bred in Soweto, he attended his primary school in Soweto and matriculated at Orange Farm, south of Johannesburg.

Dr Mamitele obtained his undergraduate degree at MEDUNSA and graduated in 2004. He further enrolled for an internship at 1 Military Hospital and did his community service at Military sickbay and Heidelberg Hospital. His courageous character allowed him to work in the urology department of the South African National Defence Force (SANDF) as a medical officer and was later deployed to various countries in Africa providing medical cover for soldiers in mission areas.

It was his childhood ambition in urology that led him to join the postgraduate programme at the University of Pretoria (UP) in 2011 - 2016. Dr Mamitele is currently a member of the South African Urological Association (SAUA) and has a special interest in kidney stone management, prostate conditions, and sexual health in men.

Botshilu Annual Healthcare Professionals' CPD Symposium

EVALUATION FORM

Thank you for attending our Annual Healthcare Professionals' CPD Symposium.

We hope it was worth your valuable time and that you learned a lot.

We would love to hear your thoughts or feedback by completing an evaluation form using the QR code. This will allow the quality of our CPDs to be monitored and continually improved. The extent to which you enjoyed and valued this learning experience is important.

Thank you for your participation.

Thanks to our sponsors:
